

WE ARE SOUNDING TWELVE YEARS!

In support of the UN's statement
that rapid change must be made by 2030

"Climate change is moving faster than we are"

António Guterres (UN Secretary-General)

"Our house is on fire"

Greta Thunberg (teenager who has inspired millions of schoolchildren to strike over inadequate government response to climate change)

**"It's down to us to change course
and that's what *Sounding Twelve Years* is all about"**

Lola Perrin (Sounding Twelve Years founder)

In October 2018 the United Nations warned us that rapid change is needed: **by 2030 we need to cut greenhouse gas emissions by 45% to avoid catastrophe.** Yet emissions continue to rise.

Sounding Twelve Years takes place right in the heart of communities and spreads information about our short timeline to avert the worst effects of the climate emergency.

From 15th April church bells will be ringing, groups of people will be chanting in public spaces, school children will be marking the number twelve in playground activities find out how we are participating – ask us!

“Climate change is now reaching the end-game... The issue is the very survival of our civilisation.” Prof Hans Joachim Schellnhuber, *for 20 years the Head of Potsdam Institute for Climate Impact Research, Senior Advisor to Pope Francis, German Chancellor Angela Merkel and the EU.*
